Plywood Boxes

- ▶ We offer to our client's superior quality of wooden boxes which are available in pinewood, plywood, and other material finishes. The services of experienced industry professionals and well-developed infrastructure facilities further help us to bring in them desired customized finishes as per the specific needs of our clients.
- ▶ We offer to our client's superior chemical treatment facilities for a wide range of wooden packaging's. This treatment helps to make our products more durable and effective against termites and other insects. We also have the facility of providing Fumigation Treatment certificate for export packing users. Industrial Heavy Machine Packaging Boxes
- ▶ We offer to our clients superior quality of wooden boxes which are available in rubberwood, plywood, and other material finishes. The services of experienced industry professionals and well-developed infrastructure facilities further help us to bring in them desired customized finishes as per the specific needs of our clients.

Pine wood case

- ▶ We manufacture pinewood boxes using good quality raw material. Our pinewood boxes are strong, durable, smooth and are capable of bearing heavy loads. We ensure that we offer cost-effective boxes that have application in numerous industries for packaging. The pinewood boxes are very popular as they offer good protection to goods during transportation.

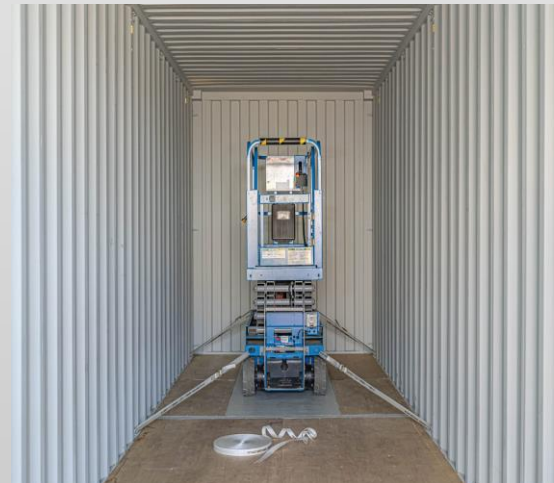

Wooden Crates

- ▶ We manufacture for our clients a wide range of wooden crates that are extensively used for heavy loadings like in transporting automobile and similar parts. Our high capacity crates are globally accepted & meet the international standards in terms of accuracy. We also have the facility of promptly delivering them to our domestic & global clients. We are a prominent manufacturer and supplier of Pine Wood Boxes that are designed using pine wood of the best class. These boxes are strong and have the high load-bearing capacity. These are suitable for heavy-duty applications and can be customized as per specifications mentioned by our customers. Pinewood boxes are appreciated for their high strength, durability and performance level.
- ▶ These pallets are invariably used for the export of grains, perishables, and other food items. Moreover, these pallets can be customized according to clients' specifications and are available at market leading prices
- ▶ We manufacture and provide superior quality 4 Way Wooden Pallets using qualitative raw material in the production process. We can customize our range as per the requirement of our clients. We design and develop four-way Pallets to be lifted by four sides using a forklift or hand jack.

Container lashing

- ▶ We do the process of securing cargo containers to the ship's deck using a system of ropes, cables, and chains. This system, also known as a lashing system, is designed to prevent the containers from shifting or tipping over during rough seas, which could cause damage to the ship or other containers.
- ▶ our lashing system consists of a series of lashing points on the ship's deck and corresponding lashing rods, twist locks, and turnbuckles on the containers themselves. The lashing rods are threaded through the container's corner castings and secured to the lashing points on the ship's deck, while the twist locks and turnbuckles tighten the system and provide additional stability
